

Release Notes Version 2.0.51 Hotfix

Bug Fixes:

- Fixed an issue with last week's update where macros were not pulling into notes or letters without clicking **Apply** first
- Fixed an issue with the electronic superbill not opening until you went through "save & sign" twice
- Fixed an issue with viewing the postural tab in vitals locking up the current tab in vitals
- Made changes to ensure DrFirst window would open in front of the UnifiMD window, as it was not for some users.
